Sustainability of Teacher Rwanda Projects

- TR collaborates with parents to develop the long-term future of the schools. Parents basing to their on capacity contribute some money for snacks for their Children. Parents also raise garden to the schools so that children can take care of the seeds germinating, noting the changes that takes place day to day of the crops.
- TR encourages parents make sure that they are aware about the benefit of the children being in TR schools, thereafter they can play their role like providing learning materials made locally and participating in the termly meeting with teachers to see which crucial components should be focused and incorporated with the schools to operate more effective. TR also is focusing on how what is happening in classroom can be transferred to the community via providing each child with a book to read at home and parents will trained to help children how to handle books and help them read and even story telling.
- TR works with churches to open schools, TR provide start kit that is furniture, books and dolls, blocks and Legos.
- TR collaborates with District like Muhanga District to start preschool. Now TR is working with Muhanga District to start preschool in Rugendabari sector probably by next year. TR will be concentrating on what is taking place inside classroom while much inputs of the District will be infrastructure and teachers' salaries.
- TR continues to increase funding to be able to cover all schools expenses.
- TR offers teachers Education and professional development about international best practices.
